

The Chicken Farm

Name _____

Experiment: Discuss each question below and record your answers.

1st – Method of Burial - How will we “bury” the chicken legs?

2nd - Data - What data do we need to collect?

3rd - Make your predictions - Which "leg" will be affected the most by maggot activity? The least? Give reasons for your predictions.

Data Collection: Complete the table following your teacher’s directions.

Date & Time	Weather Data	Observations

Conclusion: Answer the questions based on your data and observations.

1) Which chicken leg was affected the most by maggot activity? Explain.

2) Which was affected the least? Explain.

3) Were your predictions correct? Explain.

4) If we were to try again, what should we do differently?
