

Group Members: _____

For each tree identified, you need to print out a Microsoft word document with each of the following pieces of information:

- (1) The scientific name of the tree
- (2) The common name of the tree
- (3) A picture of your group with the tree

If you're really good, you are more than welcome to combine all of these into a Photoshop picture of your group with the text over the picture and just print that out.

'But teacher, how do we know what the trees are?'

On my Website, click on 'My Links' and Tree Identification Guide. Using the pictures and information that you collected in the field, correctly identify your trees.

Correctly identify your trees below:

Tree # _____ is a(n) _____

Tree # _____ is a(n) _____

Tree # _____ is a(n) _____

Tree # _____ is a(n) _____

Tree # _____ is a(n) _____

Attach the 5 printed out Microsoft word documents (or Photoshop pictures) to this lab handout with a staple.
