

# ***Handy Dandy Science Notebook Glue Options***

## ***TOP = Top Only***

*Add glue only to the top (backside) of the worksheet, which means there will probably be something else to put under it or space for notes.*

## ***FAFL = Fold-A-Flap Left***

## ***FAFR = Fold-A-Flap Right***

*These pages need to be folded back on the left or right side to create a flap that gets glued down leaving space under it for notes or another worksheet.*

## ***4C = 4 Corners***

*Glue all 4 corners (backside) of these worksheets - they will usually be the only thing on the page or make up the bottom layer.*

***Remember ... Dot, dot, not a lot!***
