## HOW To Raise A Healthy TickleMe Plant!

## Light-

- During the winter, give your TickleMe Plant<sup>™</sup> as much sunlight as possible.
- During the spring and summer, plants grow best in a window that gets sun only part of the day.

## Heat-

- TickleMe Plants like to be warm. Temperatures 70 degrees or above are great!
- Don't place them directly on a heater!

Water-

- Keep the flower pot in a dish to prevent water from leaking onto your furniture.
- Don't allow the flower pot to sit in water.
- Don't let the soil dry out completely.
- Water when the soil feels and looks dry.
